Make all text files usablePlain text report format. More formats available beside pdf	42
Error message are cryptic. Need detailed explanation of error codes. (Inconsistent error messages)	
More descriptive error messages Error reports should list problem, not every transaction that has	36
An option for Quarterly Standard Report. Quick Look report by quarter Quarterly completeness	26
Everything is slow (load, query and retrieve) Cannot post raw data (system locks up) Transactions	
are slow and system locks up (AQS freezes users pc)	26
Cancel query button still sometimes exits you from systems. Query process needs simplification -	
ending query sometimes exits system. Cancel query kills session	26
Mechanisms for posting tips and solutions for all AQS users to access. Are their any Oracle tricks	
(wildcards, etc.)? Notify of system/communication problems Email info to all users, not just regional	24
In browse you should be able to select by date along with site, monitor and POC. Sort or retrieve by	
POC. Be able to request POC, RO,MT (monitor type) on all reports [POC on drop down menu]	23
Null data listed at the end of the raw data retrievals makes it impossible to integrate with the actual	
data points. In raw data report, replace day of week with Exceptional event and regional	
concurrence flags. Add exceptional events flag back to raw data	23
Batch edit Global changes in Correct. See all errors listed in COrrect dialog box at one time	
spreadsheet? -button to table	21
Trouble certifying SLAMS report, data appears to be incorrect, makeup samples are not appearing.	21
Reports need to work as intended and produce accurate calculations -Incomplete data is not	
correctly flagged -PM2.5 in Quicklook -Raw data Ozone 1-hour not matching what is reported	21
Warning when all passwords are going to expire or grace log-in period. Password expiration	18
If we could E-mail to help Desk they might respond in a more timely manner. Help desk not	
returning calls. User Support - need to be more familiar with software that end users have to use	18
Online GEO Common File or data dictionary. Manuals (when/how) -more online context-sensitive	
help. Data dictionary for reports and input	18
PM2.5 Speciation Report. Need Speciation Report: -one stop shopping -also applies to PM2.5	
ancillary data and setting up files Add a speciation report PM2.5 and AIRTOX PM2.5 speciation	17
Mike L. Design Value Report. Design Value Report, with explanation of design value calculation.	
Design value (& standards)	17
Cannot review P&A data upon submission Possible Solution: make P&A loading procedure same	
as raw data loading procedure Add step to P&A data processing before going to production (one	
last chance to see records) P & A – see values before post	16
Summary info on parameter requirements – dp, rounding, start time	16
Message at bottom of screened to stay longer. Information line for processes are not on screen long	
enough. Status Bar Status bar flashes too fast	15
The ability for advanced printing options (double-sided or landscaping) Add "Print Current Page"	
option to print menu. Make banner pages optional on all reports	14
Add P&A to the manuals P & A (collocated) step by step instructions	14
Edits, etc can only be run once per batch and are not stored anywhere, so you can not go back and	
check after load another batch. Be able to reload same file without creating duplicates	13
Increase font size on reports so it can be readable or understandable	12
Need to be able to mix hourly and daily data and all intervals in raw data retrievals.	11
Set-up a format in either excel or Correct to speed manual data entry. Excel to AQS coding	11
Mike L. Exceptional Event Report. Add exceptional events flag back to raw data	11
Delete by session time/date	10
Raw data report to look like the old AQS report	10
Historic data shouldn't require new mandatory fields in edit or we need an "unknown" code.	9
Clear "source file" name after file submission	9
Training - need intermediate training for end users	9
Help desk open later than 2 pm PST	9
Status box to know system is working	9
Seasonal monitor set-up	9
Make early Raw Data available.	8

Can only submit one data range per report. Need to select multiples sites, parameters and dates.	
Query should allow user to select a time range, eliminate multiple queries	8
Quick Look report for multiple sites does not have a page break between states. Cannot select by	_
POC. Sort or retrieve by POC. Be able to request POC, RO,MT (monitor type) on all reports [POC	8
View more rows of data in query window.	8
Add AMP310 back to AQS (Data Inventory Report)	8
Mike L. Network Review Report. Network review	7
Better error msgs for staging table and pre-production duplicate records	7
Mike L. Data Histogram Report.	6
Need consistency in spacing of data in reports. If a day is missing there should be a space.	6
Work files at the AMP350	6
We would like a no error message for the statistical evaluation report if there were no errors.	5
Scan converts units from submitted units to something else (standard units) for Met data making	
the user unable to check their raw data before posting. In the Stats part of the loading process,	
need to see data as it was loaded (same units).	5
How do you go to the last record in maintain?	5
Have a dialog box to provide more details about the exceptional event flag being used.	5
Be able to go to "line # " in staging table to match error	5
Delete staging table and preproduction data with one delete	5
Be able to go to "line # " in staging table to match error	5
Day of the week codes are not necessary.	4
Frequently update FAQ Section	4
Data conversion problems - 1) accuracy and precision records did not convert correctly	4
Documentation for Discoverer Add a list of tables with associated fields	4
Work with agency IT staff	4
Print preview for on-screen retrievals.	3
Cannot retrieve only exceptional event data.	3
Tons of blank pages on Quick Look report. Remove unnecessary report pages. Make banner pages	
optional on all reports	3
More use of color on screens Color Schemes	3
Continuous monitors need a lower limit of <= -15.	3
Date box higher on forms	3
Old screening files allowed on-line work area that was easy to delete	3
Feedback mechanisms	2
Committee for improving/review of retrievals. (Retrieval Formats).	2
Quarterly Averages by CFR	2
Option to combine POCs for PM2.5 calculations at collocated sites	2
More often than not, there is "No help associated with this item" when using the ? Button.	2
Need batch load record count on the email so that we can tell if the right amount of records were	2
Initial log on screen should remember user ID and database.	2
Estimated report file size upon report generation.	2
List the number of records a query returns (no ? of ####)	2
XP compatibility.	2
Ability to modify sampling frequency on PM10 data	2
Ability to turn columns on/off on requested reports	2
Data conversion problems - 2) fix P&A problems	2
Improve units table (Geo/common)	2
Move cursor to new field when a field is filled	2
"AQS 101" for beginners	2
Live Chat with NCC.	
	1
Xerox very poorly due to shading.	1
Retrievals to the screen run very slowly. Reports can't be run on-line	1
Not enough digits shown in Quick Look reports	1
Be able to change sort order Sorting order	1
Schedule appointments with it staff	1

How to get rid of improperly assigned monitors Technical Advisory Group for Met Standard (Gary) People who cannot attend the conference have no voice in decision making. When you expand the screen the view actually does not show more tabs. It only expands into gray Add needs a freeze frame on site id as well as state on Correct. Data hand keyed in Correct is in different order than the pipe delimited data. Correct data viewing needs to be sorted at least by site/parameter/date. P/A summary report does not display accuracy data. Data Completeness needs to omit graphic space wasters and sort by site. All retrievals, need to select by agency number not English name. New AIRS force the running of more reports due to selection restrictions. "Not" option in Query. Information bar prompts you to do something you just did. End of file character crashes system. O Zoom Window Control Button No "enter query" in read only mode Move "cancel session" button on Batch Load Screen Show sample value on statistical evaluation report error text Ability to select "qualifier" on a manual edit Small batch files require more sessions to load data When to use queries O Expanse a character.
